01

## Foundation

Tandara transforms fragmented local signals, preparedness plans, and community reports into clearer shared readiness—without replacing official disaster authorities.

**Calm**

People open Tandara when they are worried. The brand lowers the temperature with quiet colour, steady type and no alarm graphics.

**Source-first**

Every piece of information shows where it came from, when, and who reviewed it. Trust must be visible.

**Honest about gaps**

Unknown is safer than invented. The brand never implies safety, certainty or authority it does not have.

02

## Logo

The mark is a ripple. The amber point is the local signal: one observation, one household, one report. The closed ring is the reviewed, shared understanding around it. The outer ring is readiness reaching the wider community, left open because what is known is never complete. The wordmark is lowercase Plus Jakarta Sans Bold, approachable rather than institutional.

tandara

**Clear space**

Keep X free on every side. X is half the height of the mark.

X

X tandara

**Minimum size**

Below these sizes the rings fill in. Use the mark alone when space is tight.

tandara

Lockup · 96 px / 25 mm

Mark · 16 px / 5 mm

### Incorrect use

tandara — Don't stretch or squash

tandara — Don't recolour, never in red

tandara — Don't rotate the mark

tandara — Don't add shadows or effects

tandara — Don't place on busy backgrounds

TANDARA — Don't rearrange or retype

03

## Colour

Deep water and calm teal carry the brand. Amber is the signal colour: used sparingly, for the mark and the single most important action on a screen. Red is reserved for system errors only. It never appears in the logo or in brand moments, so it keeps its meaning.

| Paper on Teal | 5.6 : 1 AA |
| Deep on Signal | 6.8 : 1 AA |
| Muted on Paper | 5.6 : 1 AA |

04

## Typography

Plus Jakarta Sans was designed in Jakarta and reads clearly on low-end Android screens. IBM Plex Mono is used only for metadata: timestamps, versions, sources and IDs. That makes the provenance of every card easy to spot. Body text never goes below 16 px for residents.

05

## Status labels

Labels are the most important brand element inside the product. Each one pairs an icon, a word and a colour, so the meaning survives for colour-blind users and on greyscale screens. AI and Simulation labels use a dashed border to signal that the content is not verified or not real.

| | | |
|---|---|---|
| **Official Information** | Content from BMKG, BNPB, BPBD or local government. | `status/official` |
| **Published Local Plan** | A plan with a named owner, version and review date. | `status/plan` |
| **Community Report** | Submitted by a resident. Always shown with its review state. | `status/community` |
| **Awaiting Review** | Not yet seen by a coordinator. | `status/awaiting` |
| **Reviewed by Local Coordinator** | A human reviewed it. Not a guarantee of accuracy. | `status/reviewed` |
| **AI Suggestion — Not Verified** | Machine output. Always dashed, always grey. | `status/ai` |
| **Simulation / Drill** | Drill content. Never mixed with real reports. | `status/simulation` |
| **Saved Offline** | Cached copy. Pair with Last Updated timestamp. | `status/offline` |
| **No Recent Information Available** | No reports. Never rendered as "safe". | `status/no-info` |
| **Sync Failed** | System errors only. The one place red is allowed. | `status/system-error` |

06

## Iconography

Use Lucide (open source, ISC licence, available as a Figma plugin). Its rounded 2 px stroke matches the rings in the mark. Icons always sit next to a text label in resident screens.

`Grid 24 px` `Stroke 2 px, round caps` `Sizes 16 · 20 · 24` `Colour Deep or Teal`

| | |
|---|---|
| Home | `house` |
| Flooding | `droplets` |
| Road access | `route` |
| Fallen tree | `tree-pine` |
| Facility | `building-2` |
| Follow-up | `hand-helping` |
| Plan | `clipboard-list` |
| Checklist | `list-checks` |
| Contact | `phone` |
| Meeting point | `map-pin` |
| Offline | `cloud-off` |
| Report | `message-square-text` |

**Do**

Use neutral, descriptive icons: house, droplets, road, people, phone.

**Don't**

Use shields, check-marks on locations, sirens or skulls. They imply safety guarantees or official alerts Tandara does not issue.

07

## Tone of voice

Tandara speaks like a calm neighbour who helps coordinate the RW: plain Bahasa Indonesia, short sentences, specific next steps. It says what is known, what is not, and who said it.

**Plain**

Everyday words. No jargon, no acronyms without explanation. Readable at primary-school level.

**Steady**

No exclamation marks, no capitals for emphasis, no urgency words unless an official source uses them.

**Accountable**

Name the source and the time. Say "we don't know yet" when that is the truth.
